

CASE STUDY

New Store Openings & Remodels

Supporting DSW store openings and remodels across multiple sites.

Prime-Net provides complete structured cabling and retail technology equipment installation for DSW's new store openings and remodels, supporting their multi-site program.

THE CHALLENGE

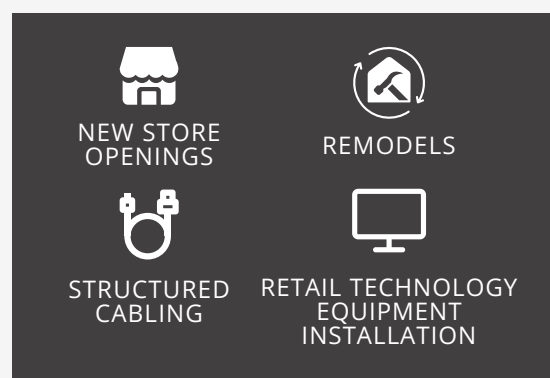

DSW requires consistent, reliable technology infrastructure across new store openings and remodels to support its retail operations. Each location must meet brand standards, stay on schedule, and with minimal disruption to store operations, while managing activity across multiple sites.

WHAT PRIME-NET DID

Prime-Net delivered complete structured cabling and retail technology equipment installation for DSW's new store openings and remodels. Our team coordinates with DSW and project stakeholders to execute installations efficiently across multiple locations, following standardized processes and quality standards.

THE RESULT

DSW received a consistent and reliable technology infrastructure at every location, supporting smooth store openings and successful remodels across its multi-site program.

SCOPE DELIVERED

- Complete structured cabling installation
- Retail technology equipment installation
- New store openings
- Remodels & renovations
- Supported a multi-site program
- Coordinated with DSW & project stakeholders
- Executed to brand standards & quality requirements
