

Three brands. One partner. Seamless technology deployment.

Prime-Net supports TJX brands (TJ Maxx, Marshalls, and HomeGoods) with structured cabling and retail technology equipment installations for new store openings and remodels across all three brands.

THE CHALLENGE

TJX's fast-paced growth and ongoing remodel programs require consistent, high-quality technology infrastructure across a large number of locations and three distinct brands. Each store must be equipped with reliable network, POS, and retail technology systems, delivered on schedule and to brand standards.

WHAT PRIME-NET DID

Prime-Net coordinated with TJX's project teams to deliver structured cabling and retail technology equipment installation for new store openings and remodels. Our team ensured consistent execution across all three brands, with standardized processes, trained technicians, and clear communication from start to finish.

THE RESULT

TJX's stores are opened and remodeled with reliable, scalable technology infrastructure — helping each brand deliver a seamless shopping experience for their customers.

SCOPE DELIVERED

- Structured cabling installation
- Retail technology equipment installation (POS, network, security, etc.)
- New store openings
- Remodels
- Execution across TJ Maxx, Marshalls, and HomeGoods
